WORKING PROTOTYPE SHOWCASE

J.A.R.V.I.S AI

Autonomous AI Desktop Assistant & Neural Interface

A futuristic, local-first autonomous desktop AI assistant featuring an interactive 3D particle HUD, neural voice synthesis and speech recognition, multi-model LLM routing, and full OS automation capabilities.

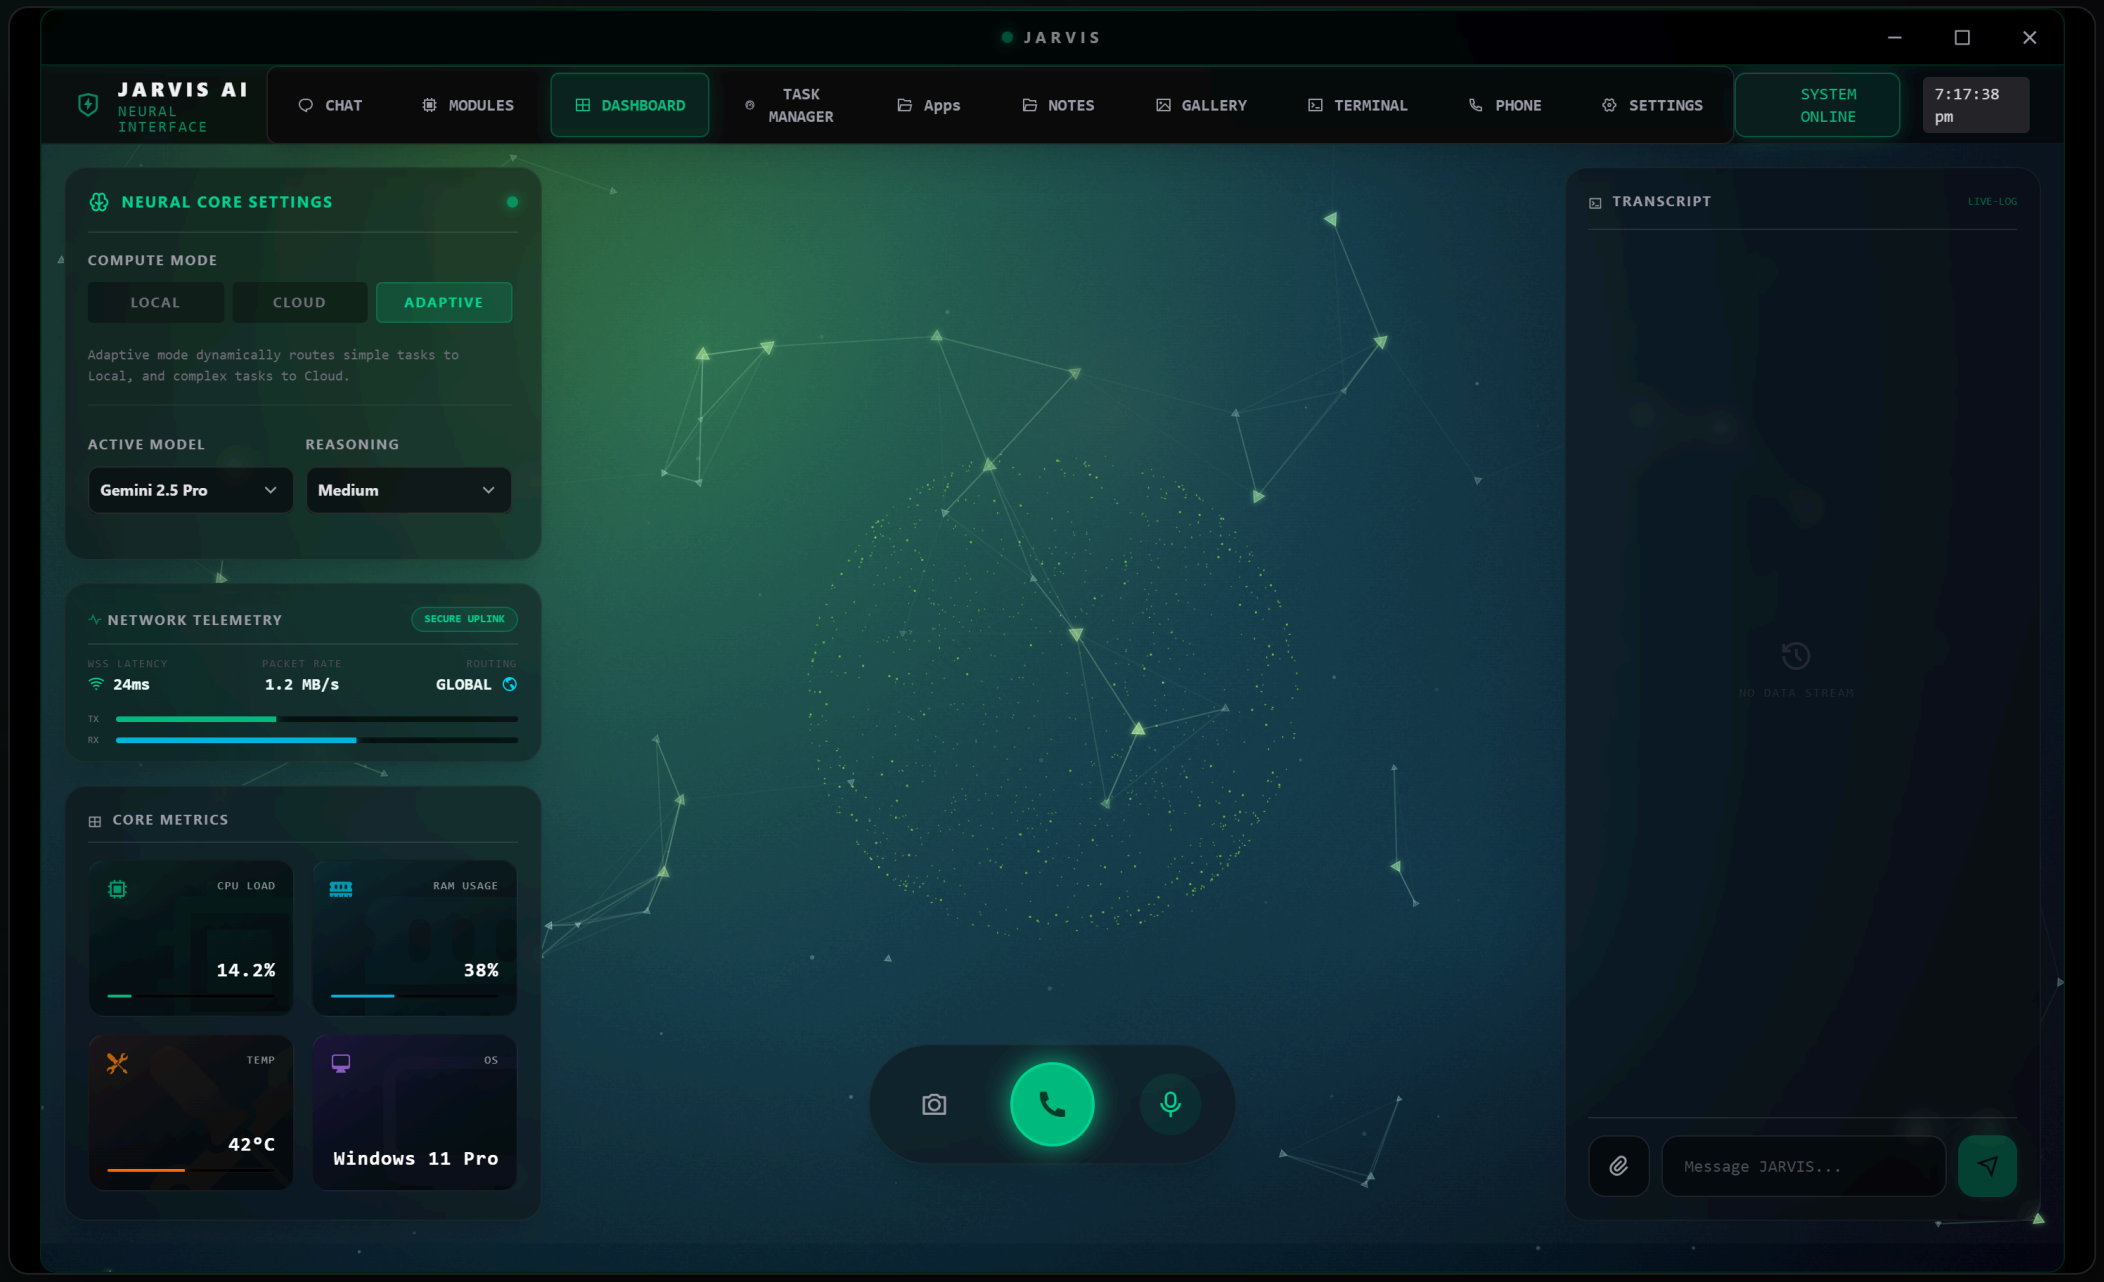

Electron 40 + React 19 | Three.js 3D Particle HUD | Faster-Whisper & Piper Voice Engine | Nous Hermes Agent Runtime | Ollama / Gemini / Claude / GPT Routing | Puppeteer Stealth Automation | Node-Pty Terminal Console

---

Futuristic 3D Particle HUD Dashboard

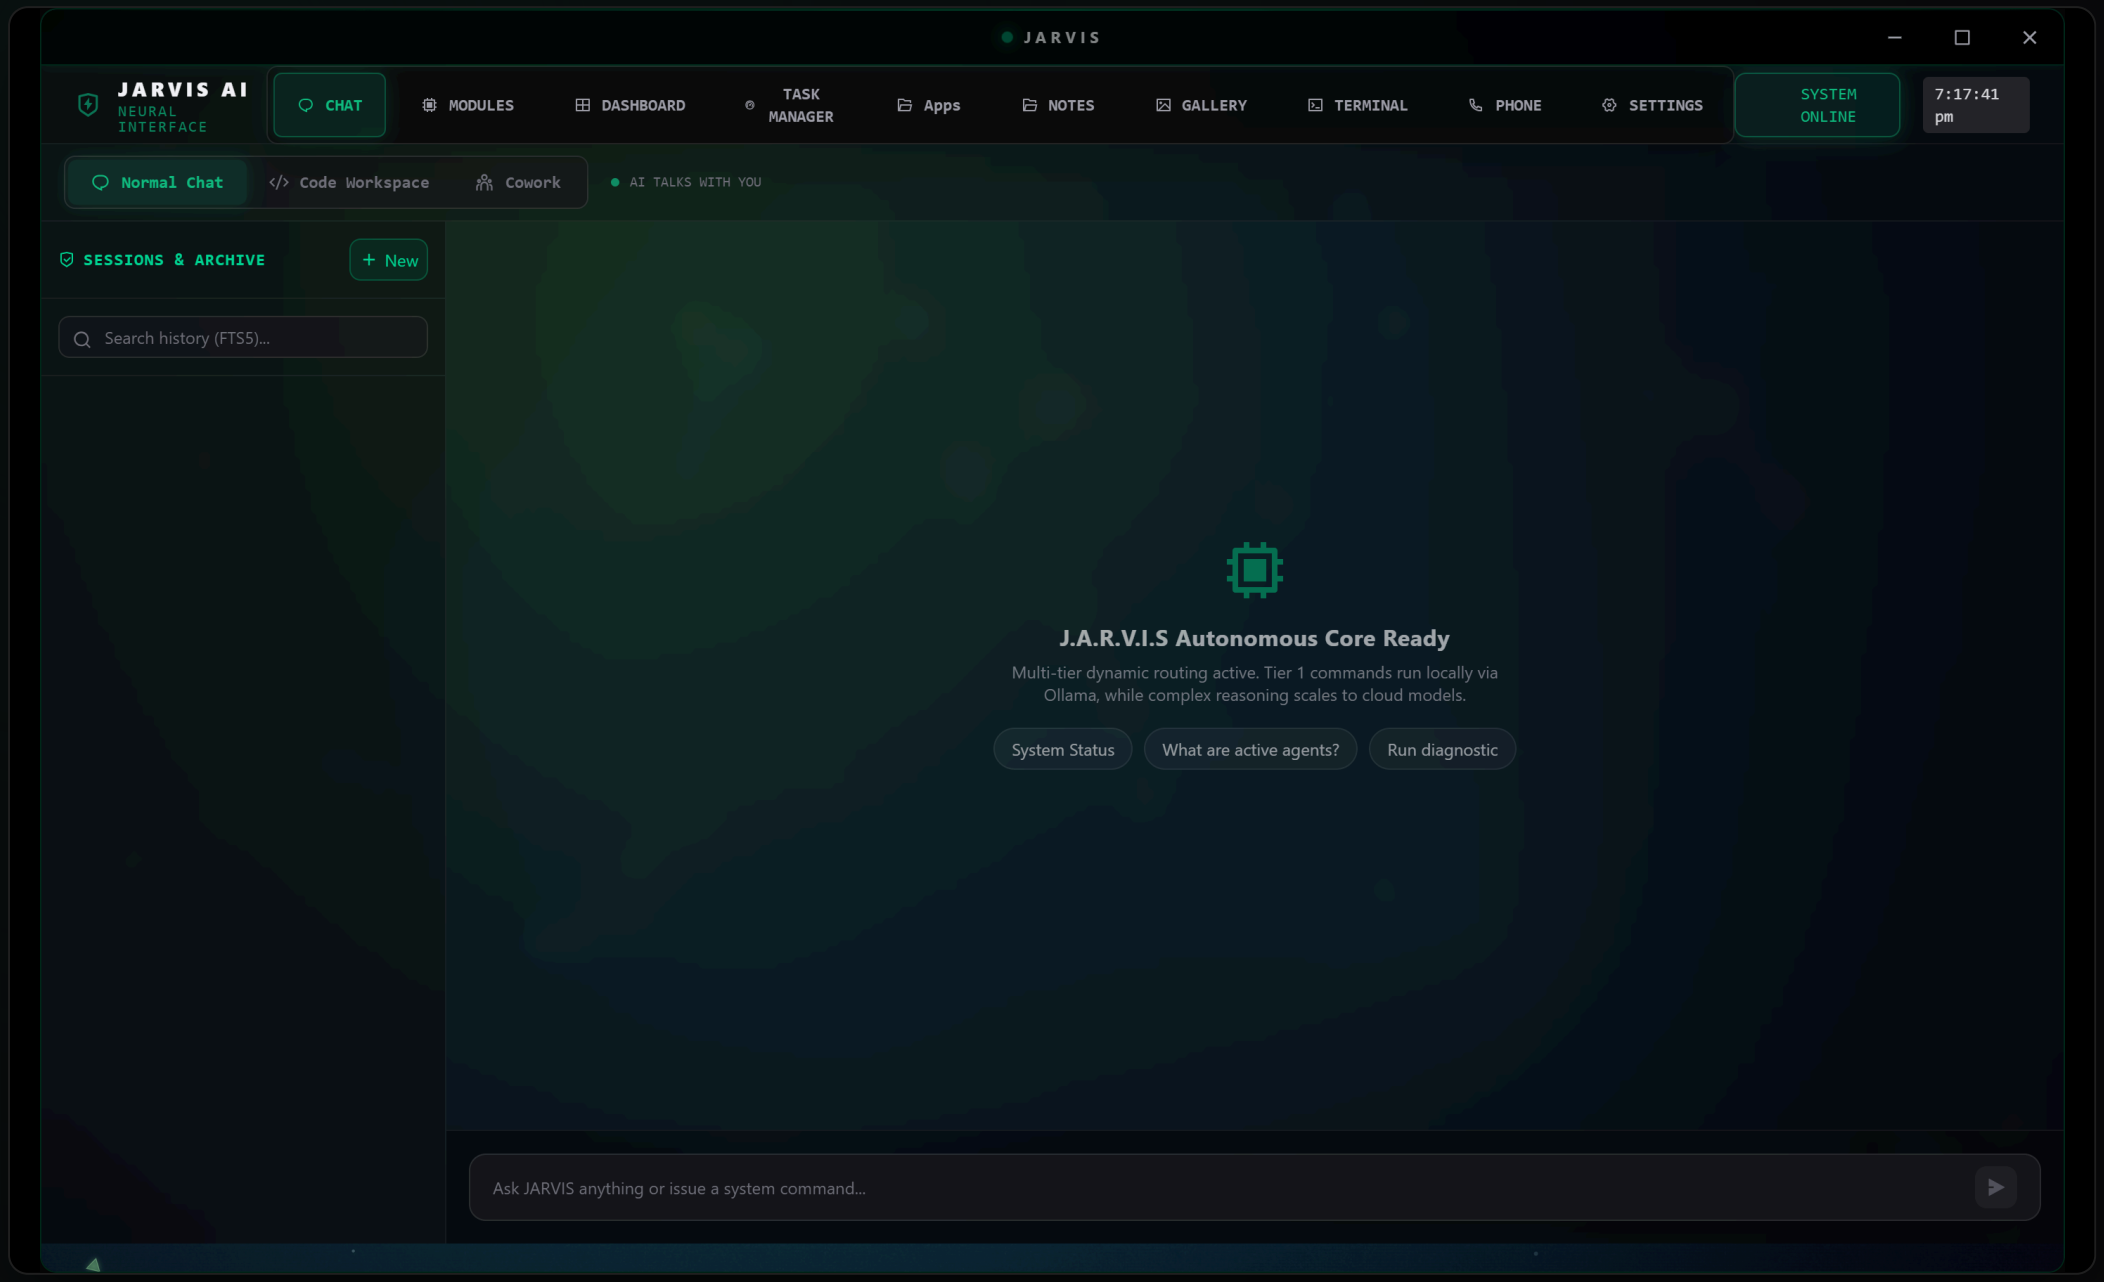

Interactive 3D particle neural interface, live system telemetry (CPU Load, RAM Usage, Temperature, OS Uptime), voice state indicators, and real-time audio visualizer.

Developer Contact: +91 8145406618 (Oishik)

Autonomous Multi-Model AI Chat & Workspace

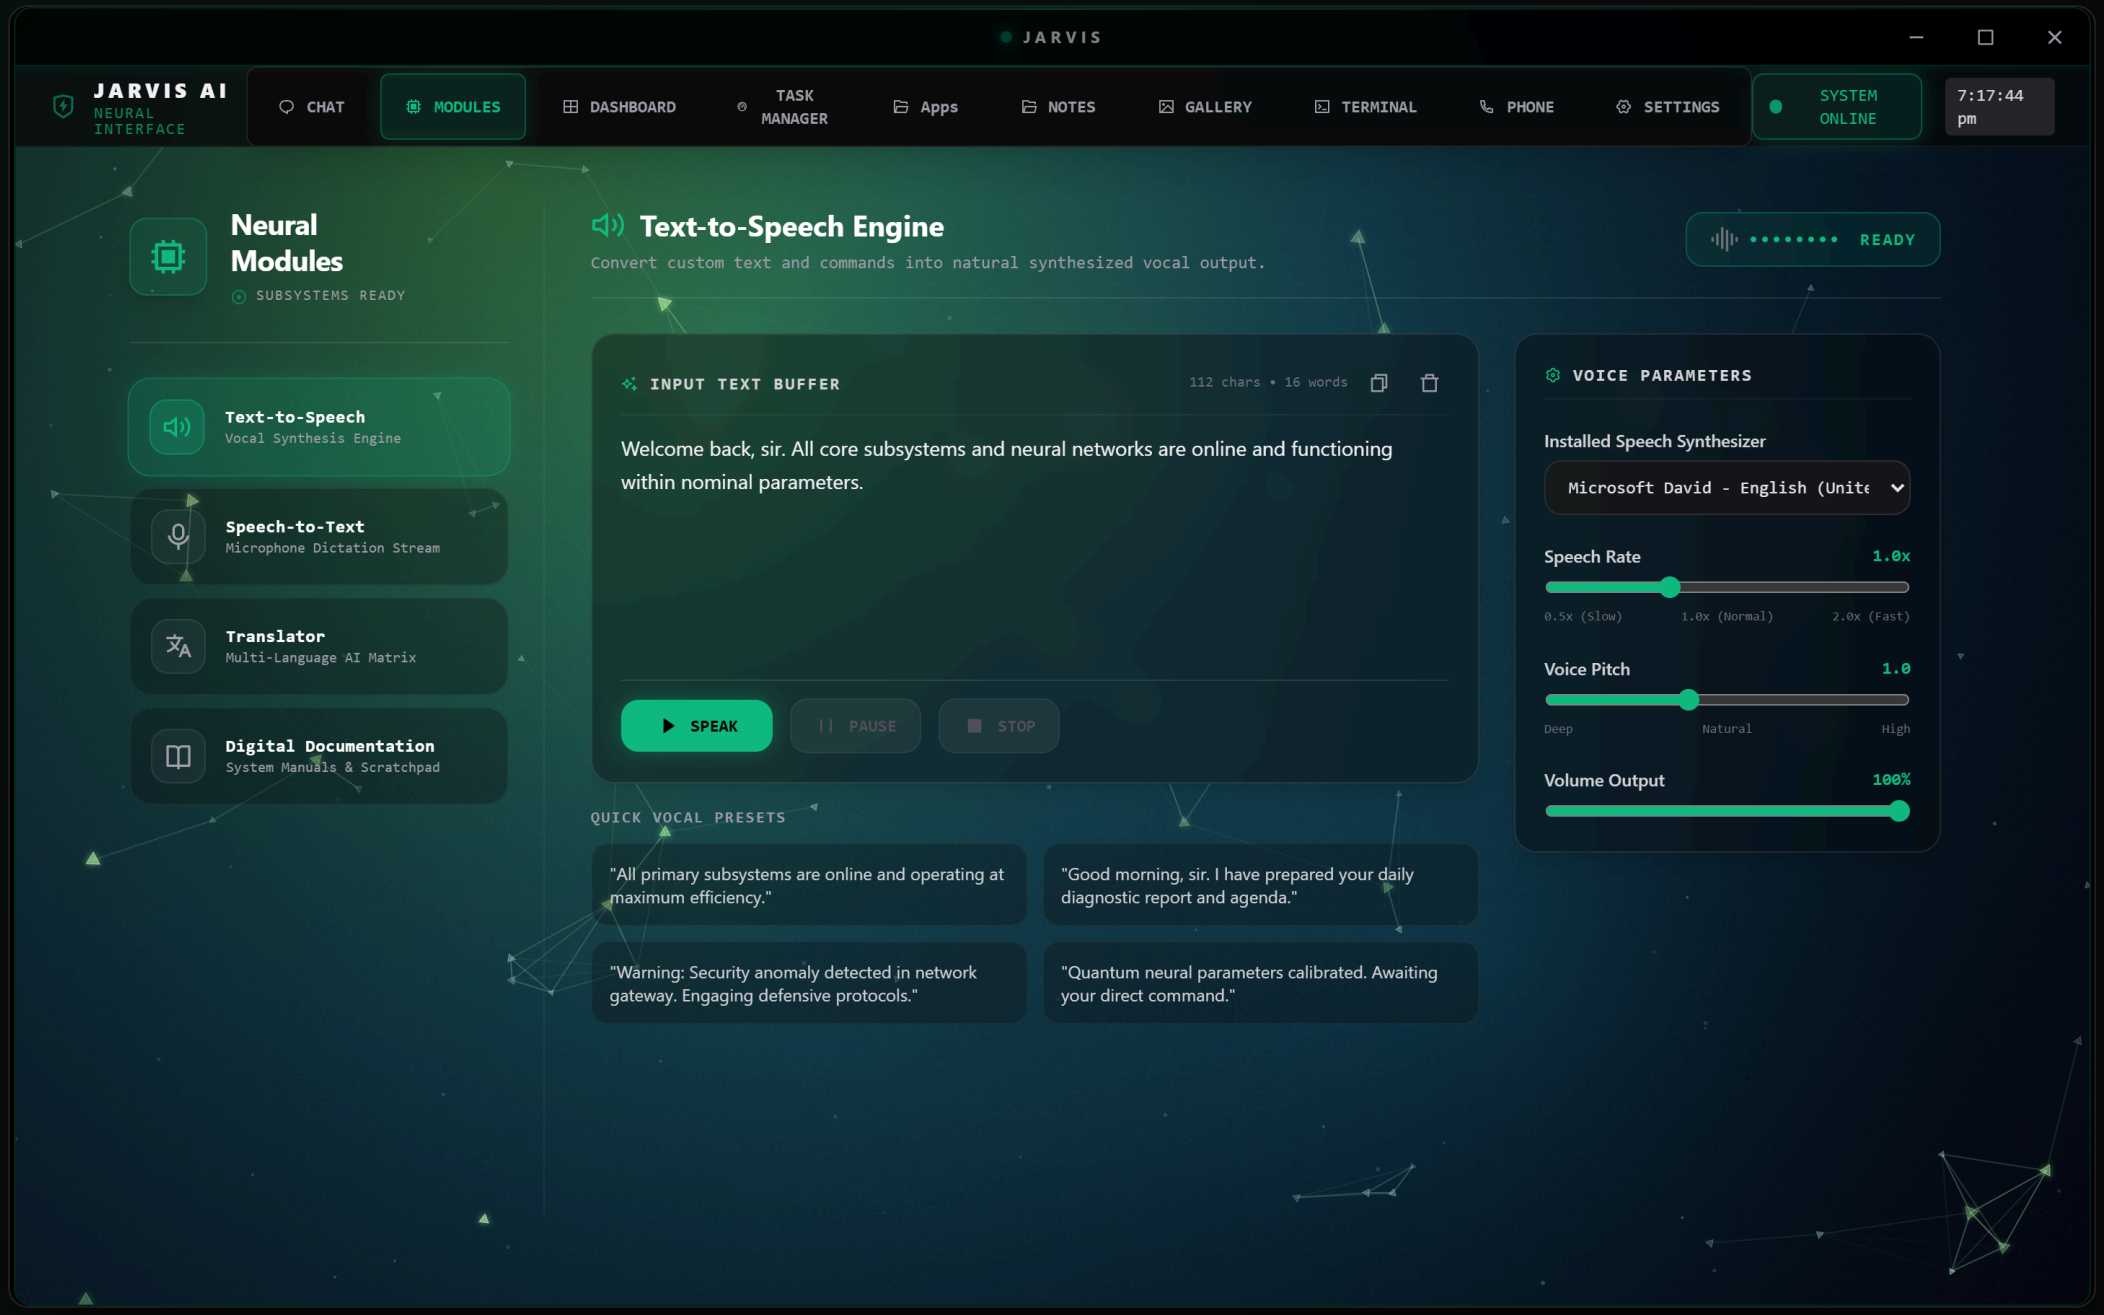

Interactive AI conversational environment featuring multi-tier routing (Ollama, Gemini, Claude, OpenAI), persistent session memory, and autonomous skill execution.

Developer Contact: +91 8145406618 (Oishik)

Neural Automation & Capability Modules

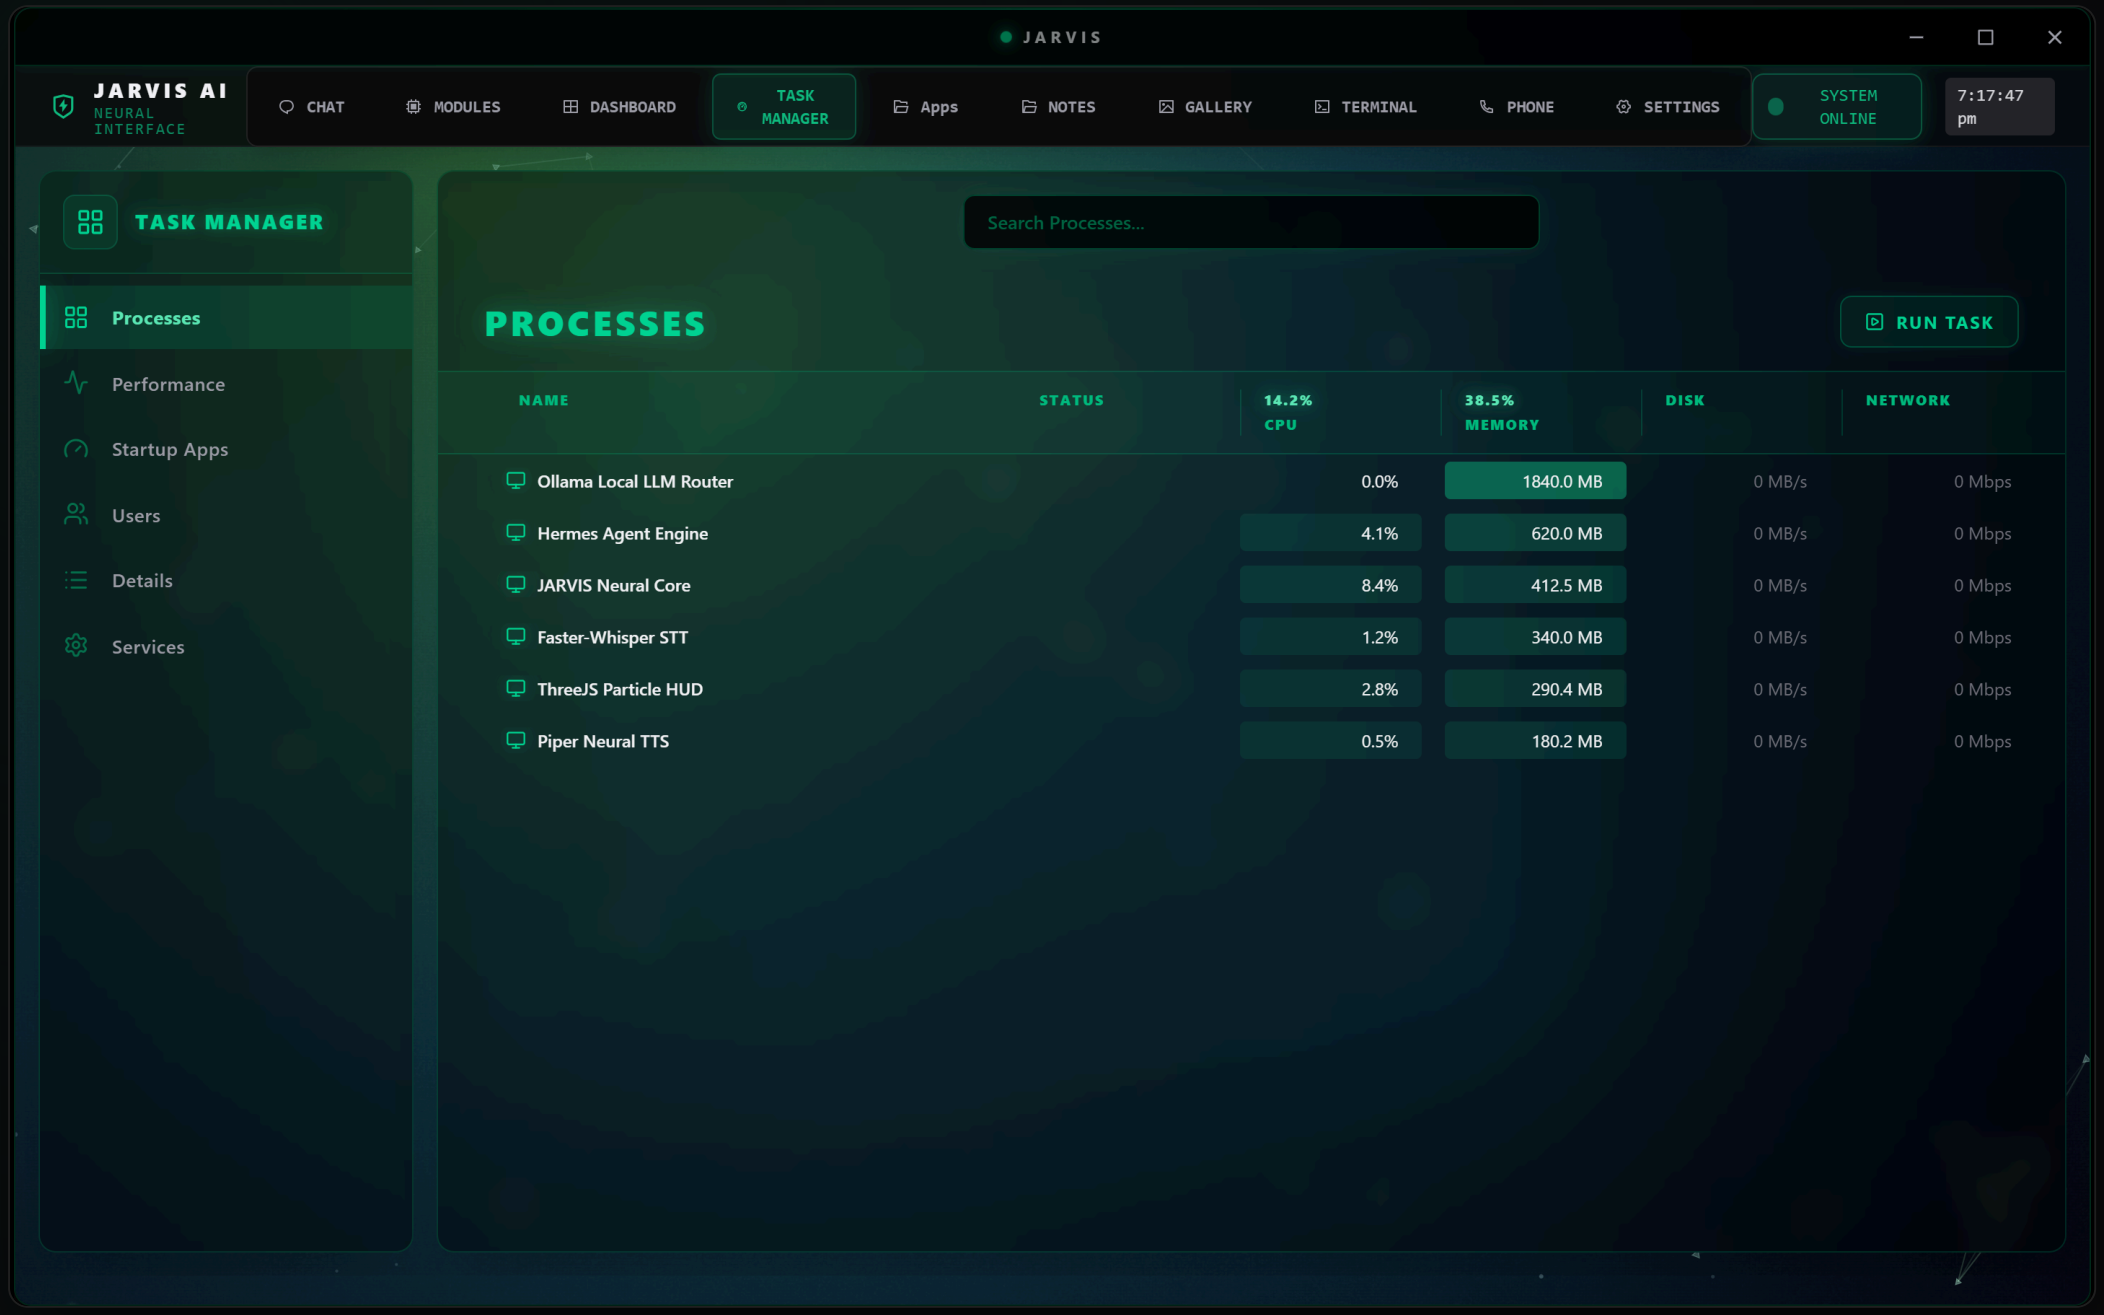

Registry of pre-built autonomous agent skills for vocal synthesis, speech transcription, translation, and scheduled background routines.

Developer Contact: +91 8145406618 (Oishik)

System Diagnostics & Real-Time Process Monitor

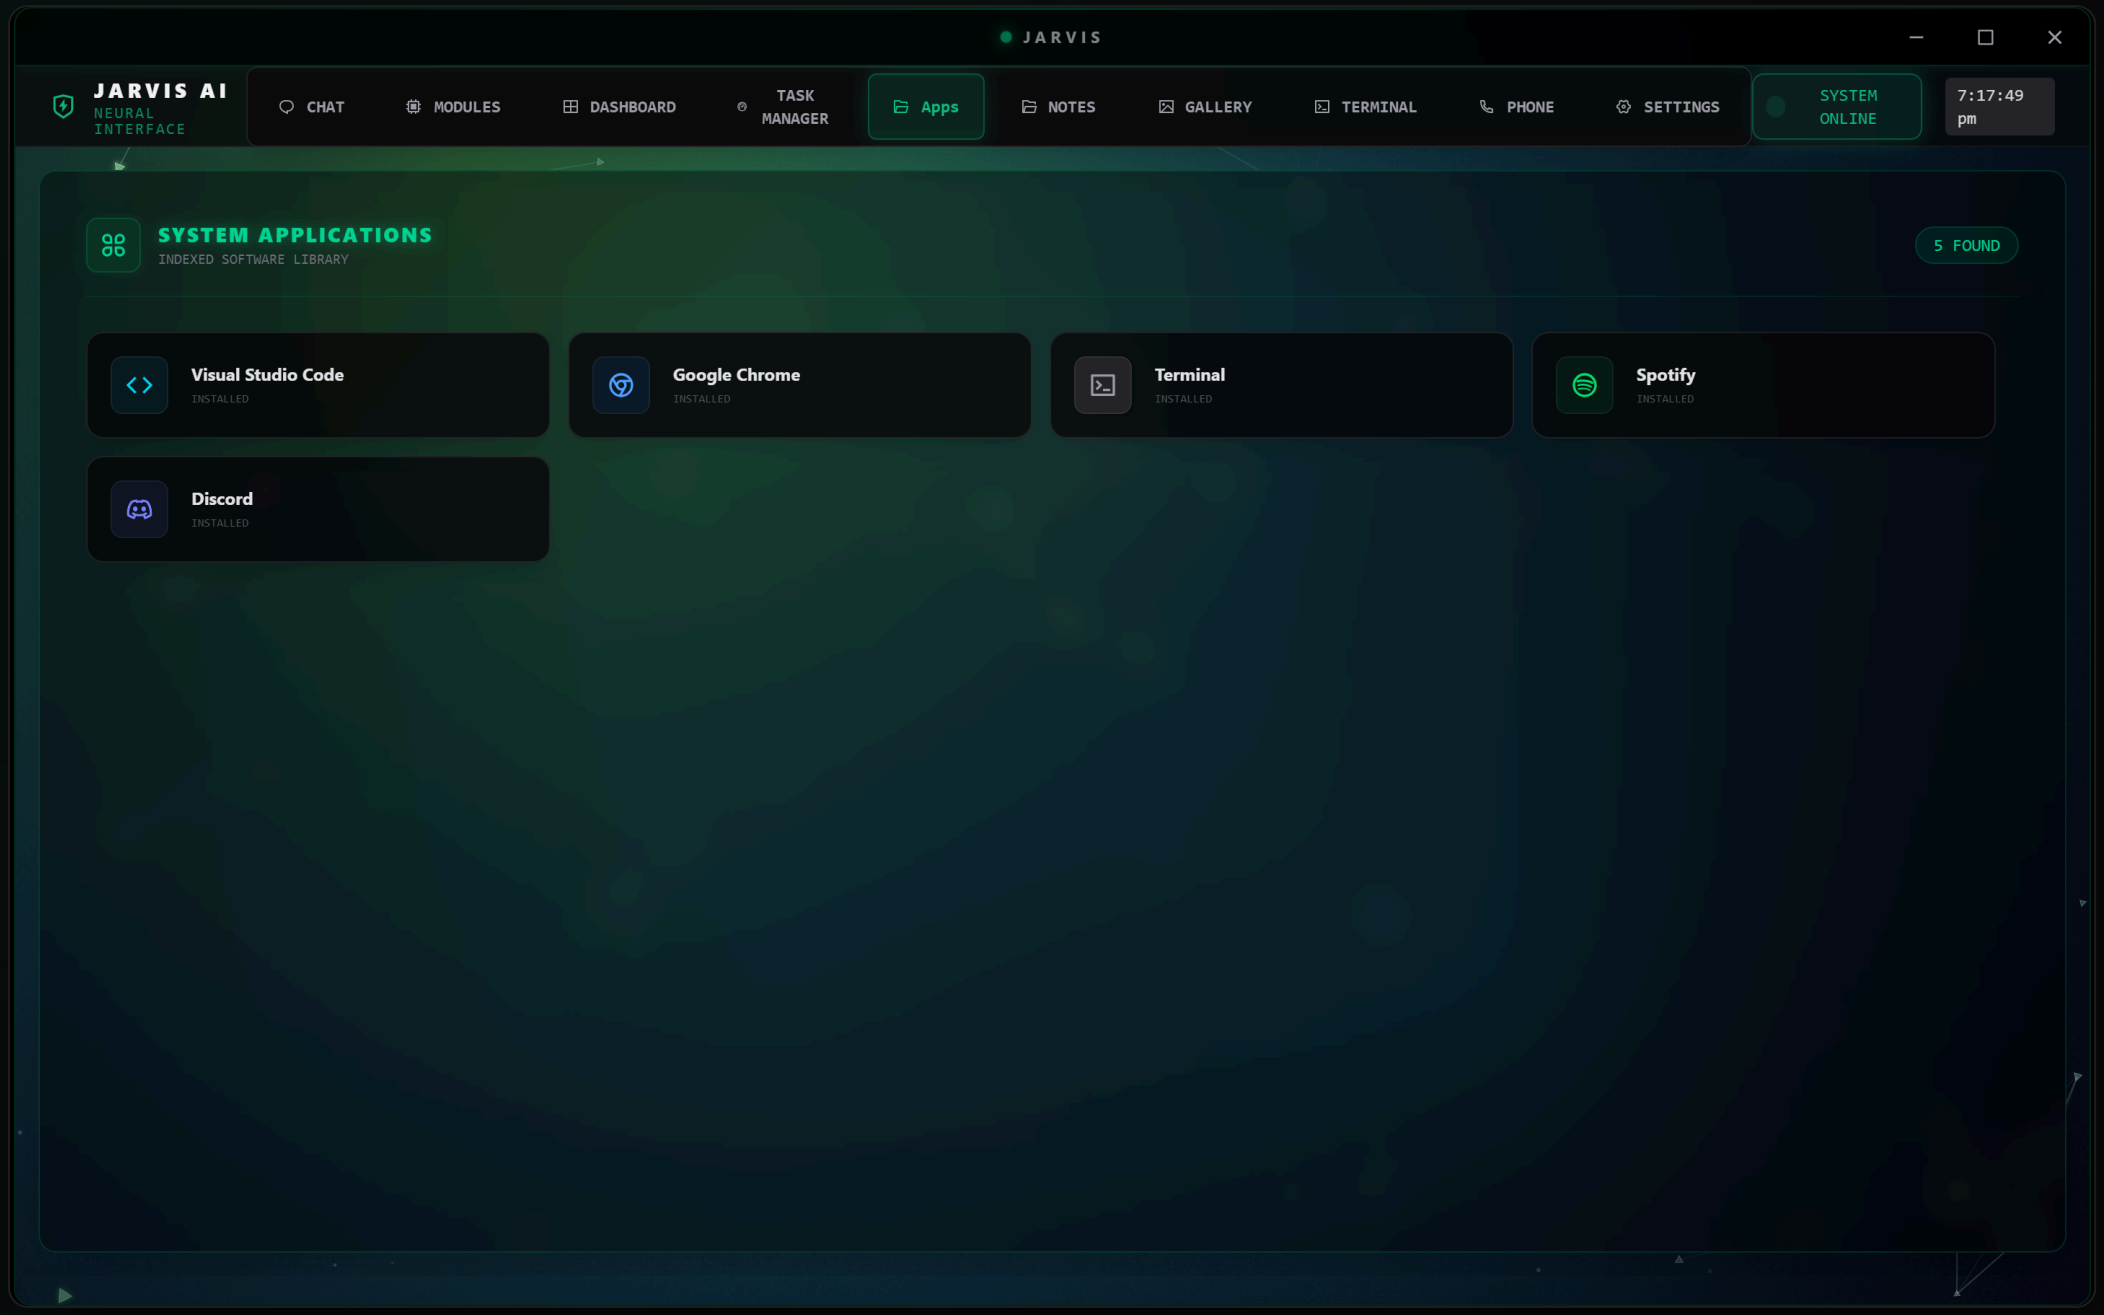

Live hardware utilization charts, active background process hierarchy, memory consumption metrics, and task supervisor.

Developer Contact: +91 8145406618 (Oishik)

Integrated AI App Store & Plugin Hub

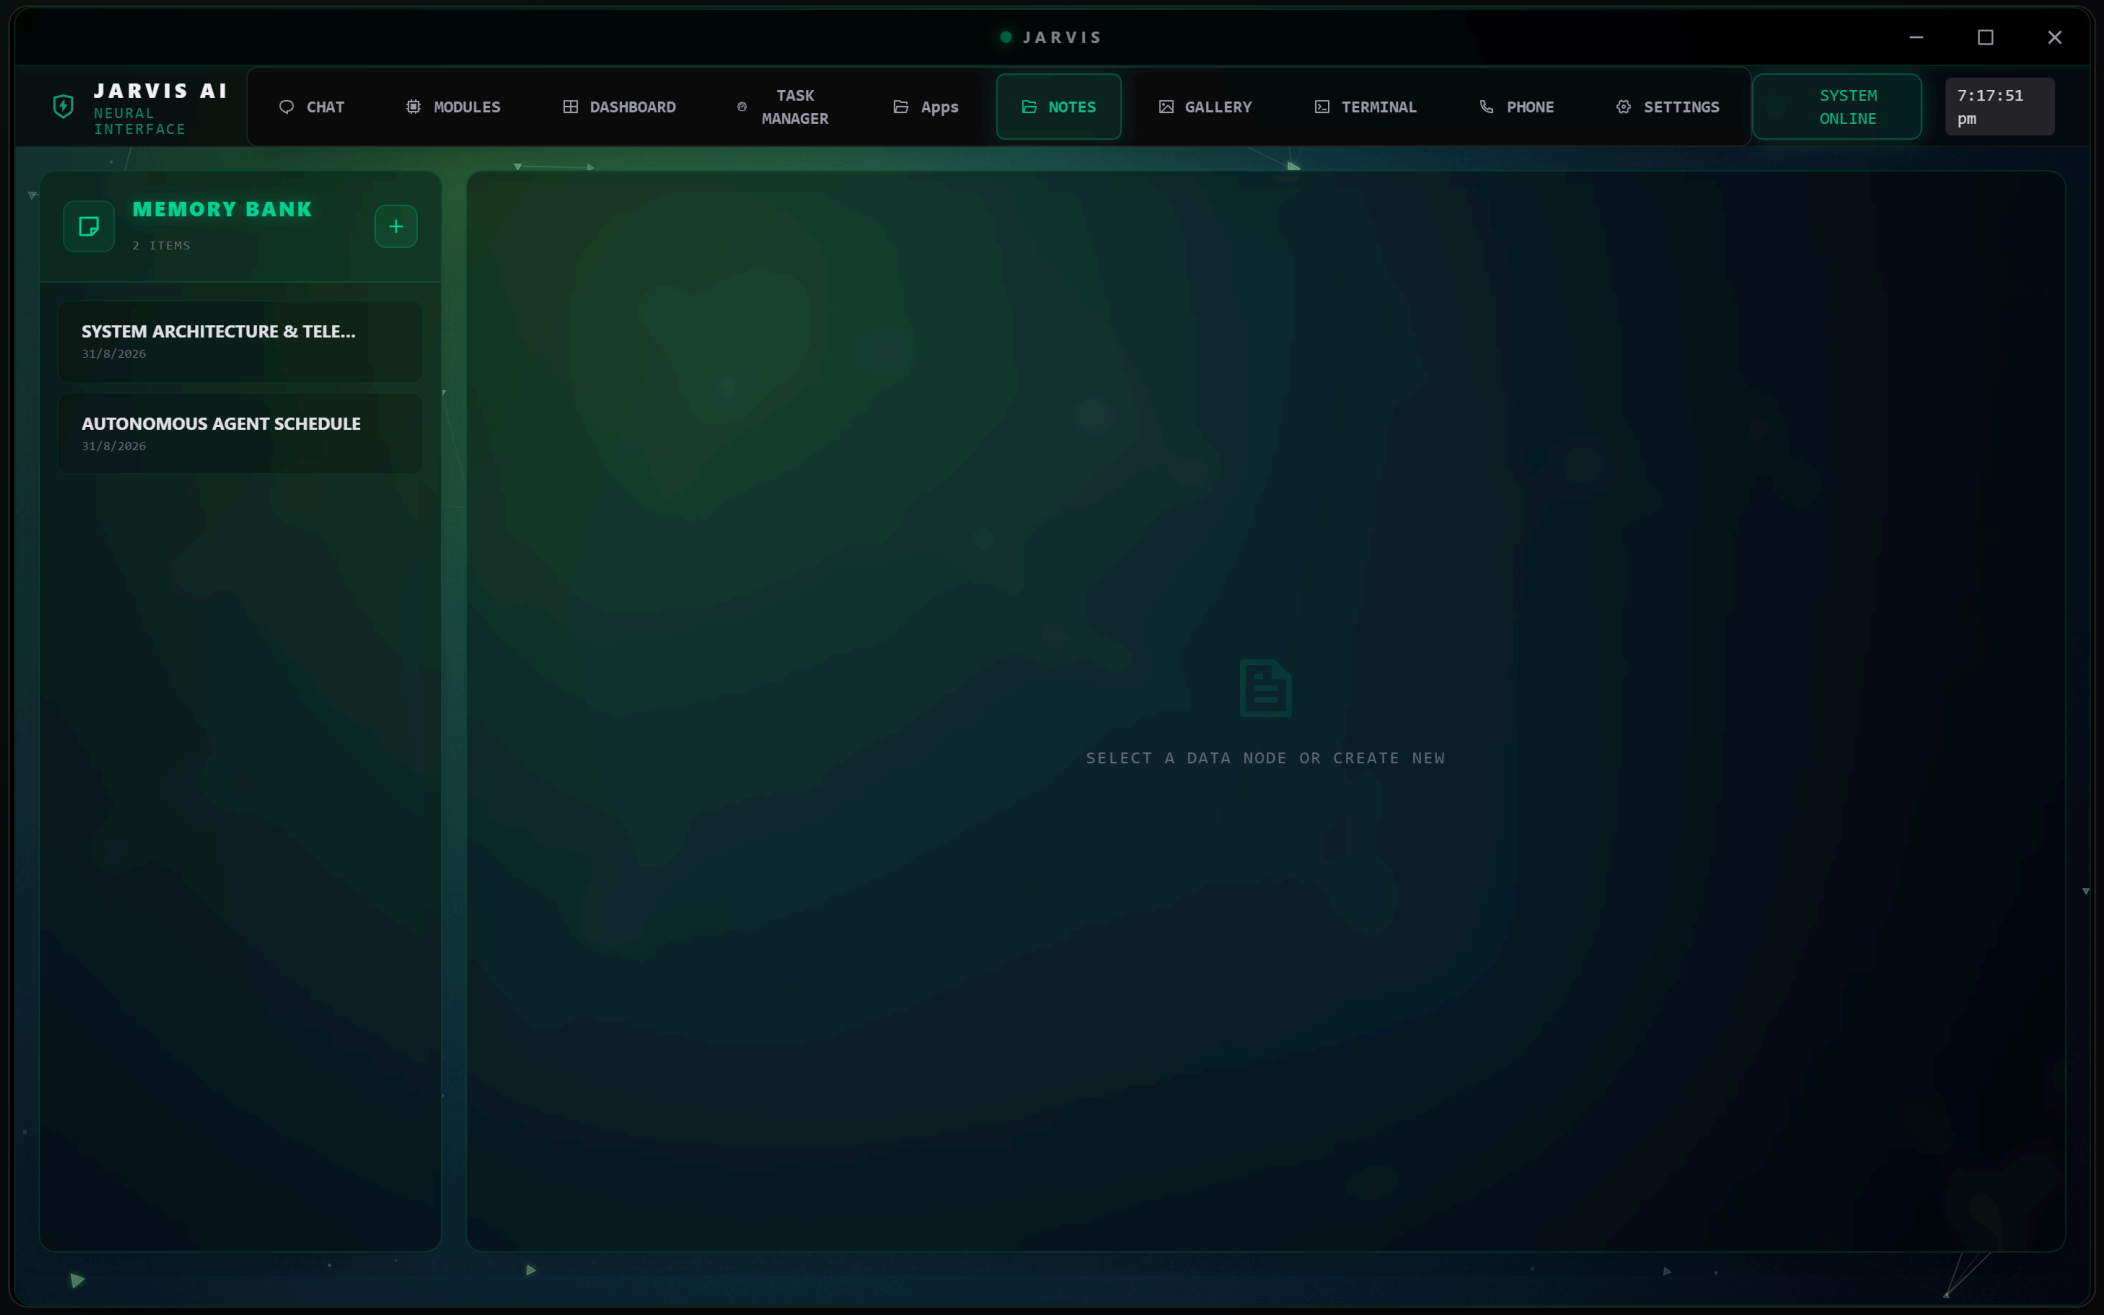

Extensible ecosystem of productivity tools, developer plugins, and custom integrations with one-click activation.

Developer Contact: +91 8145406618 (Oishik)

Persistent Scratchpad & Quick Notes

Local-first markdown scratchpad and note-taking tool linked with persistent agent memory bank.

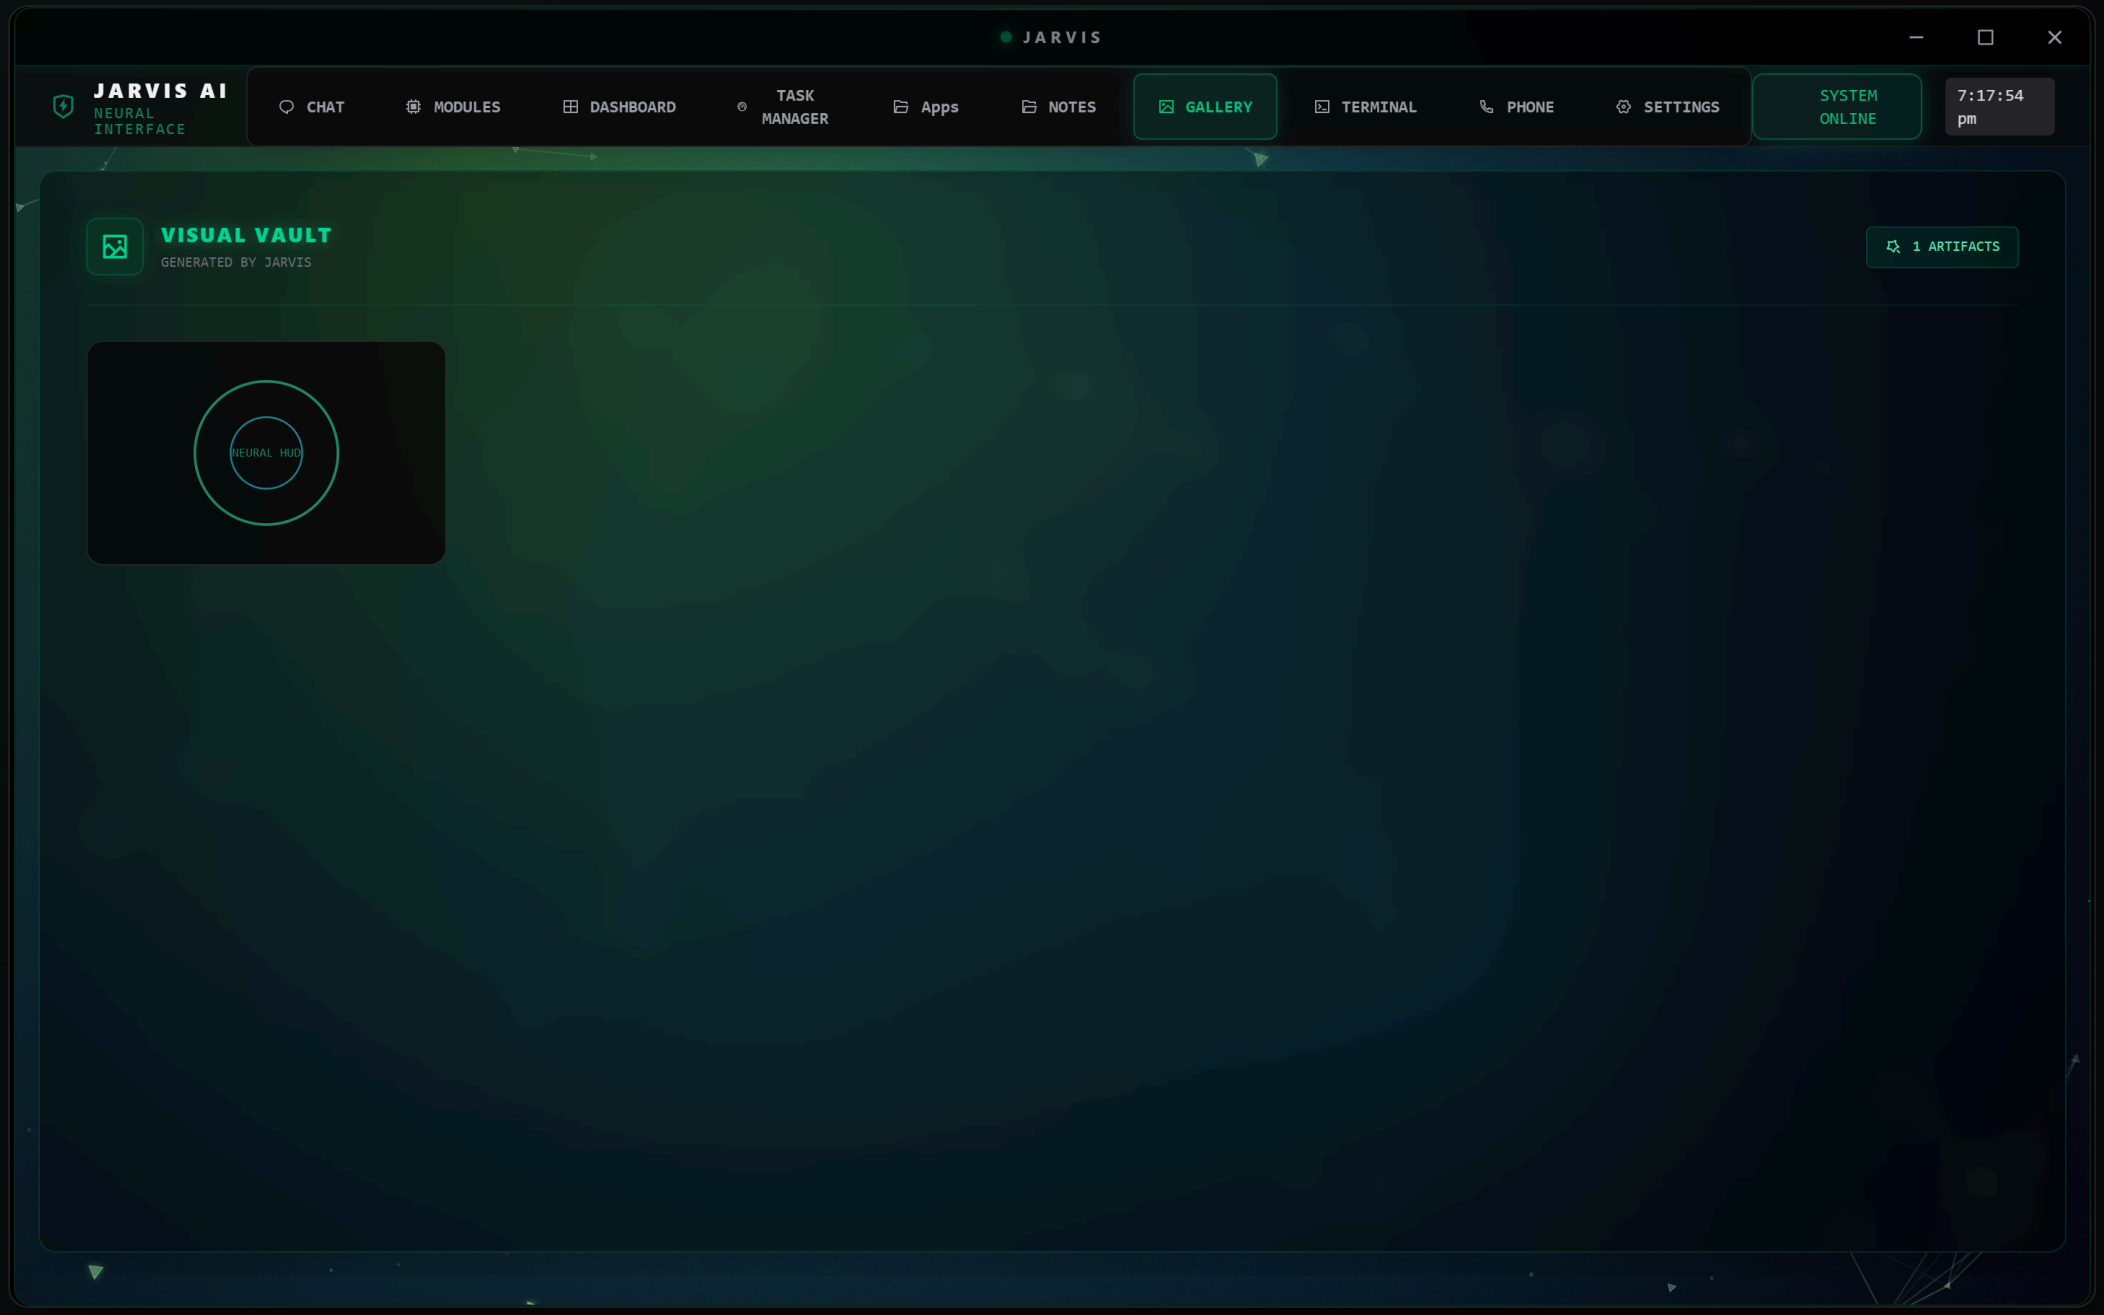

Developer Contact: +91 8145406618 (Oishik)

Media, Vision & Image Generation Hub

TAB 07 / 10

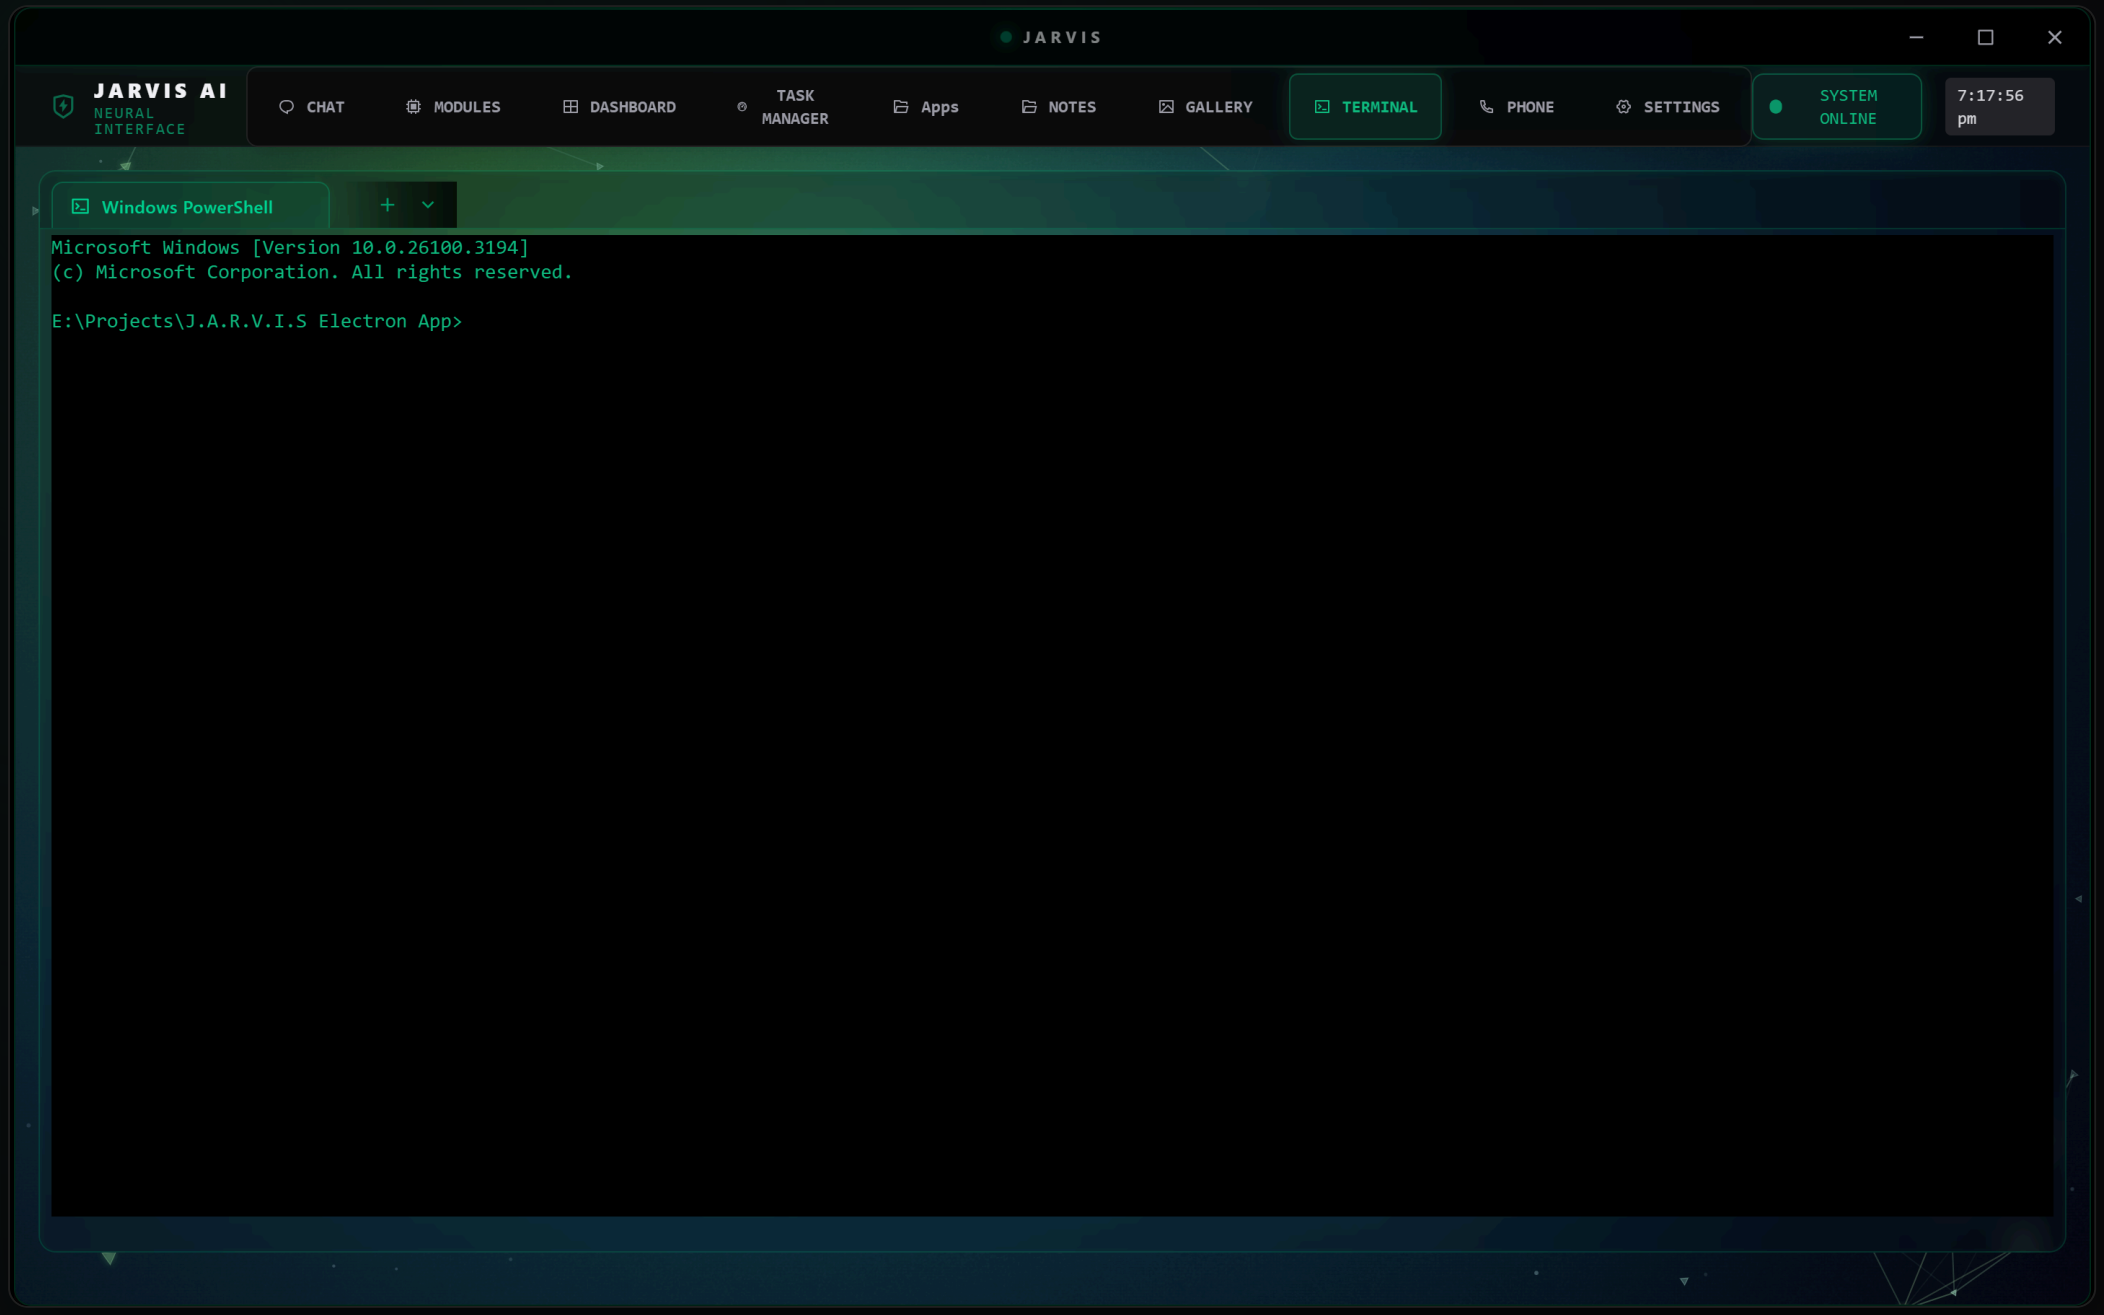

Visual assets manager showcasing camera inputs, desktop screen captures, and multi-modal AI generation results.

Developer Contact: +91 8145406618 (Oishik)

Direct System Terminal & Neural CLI

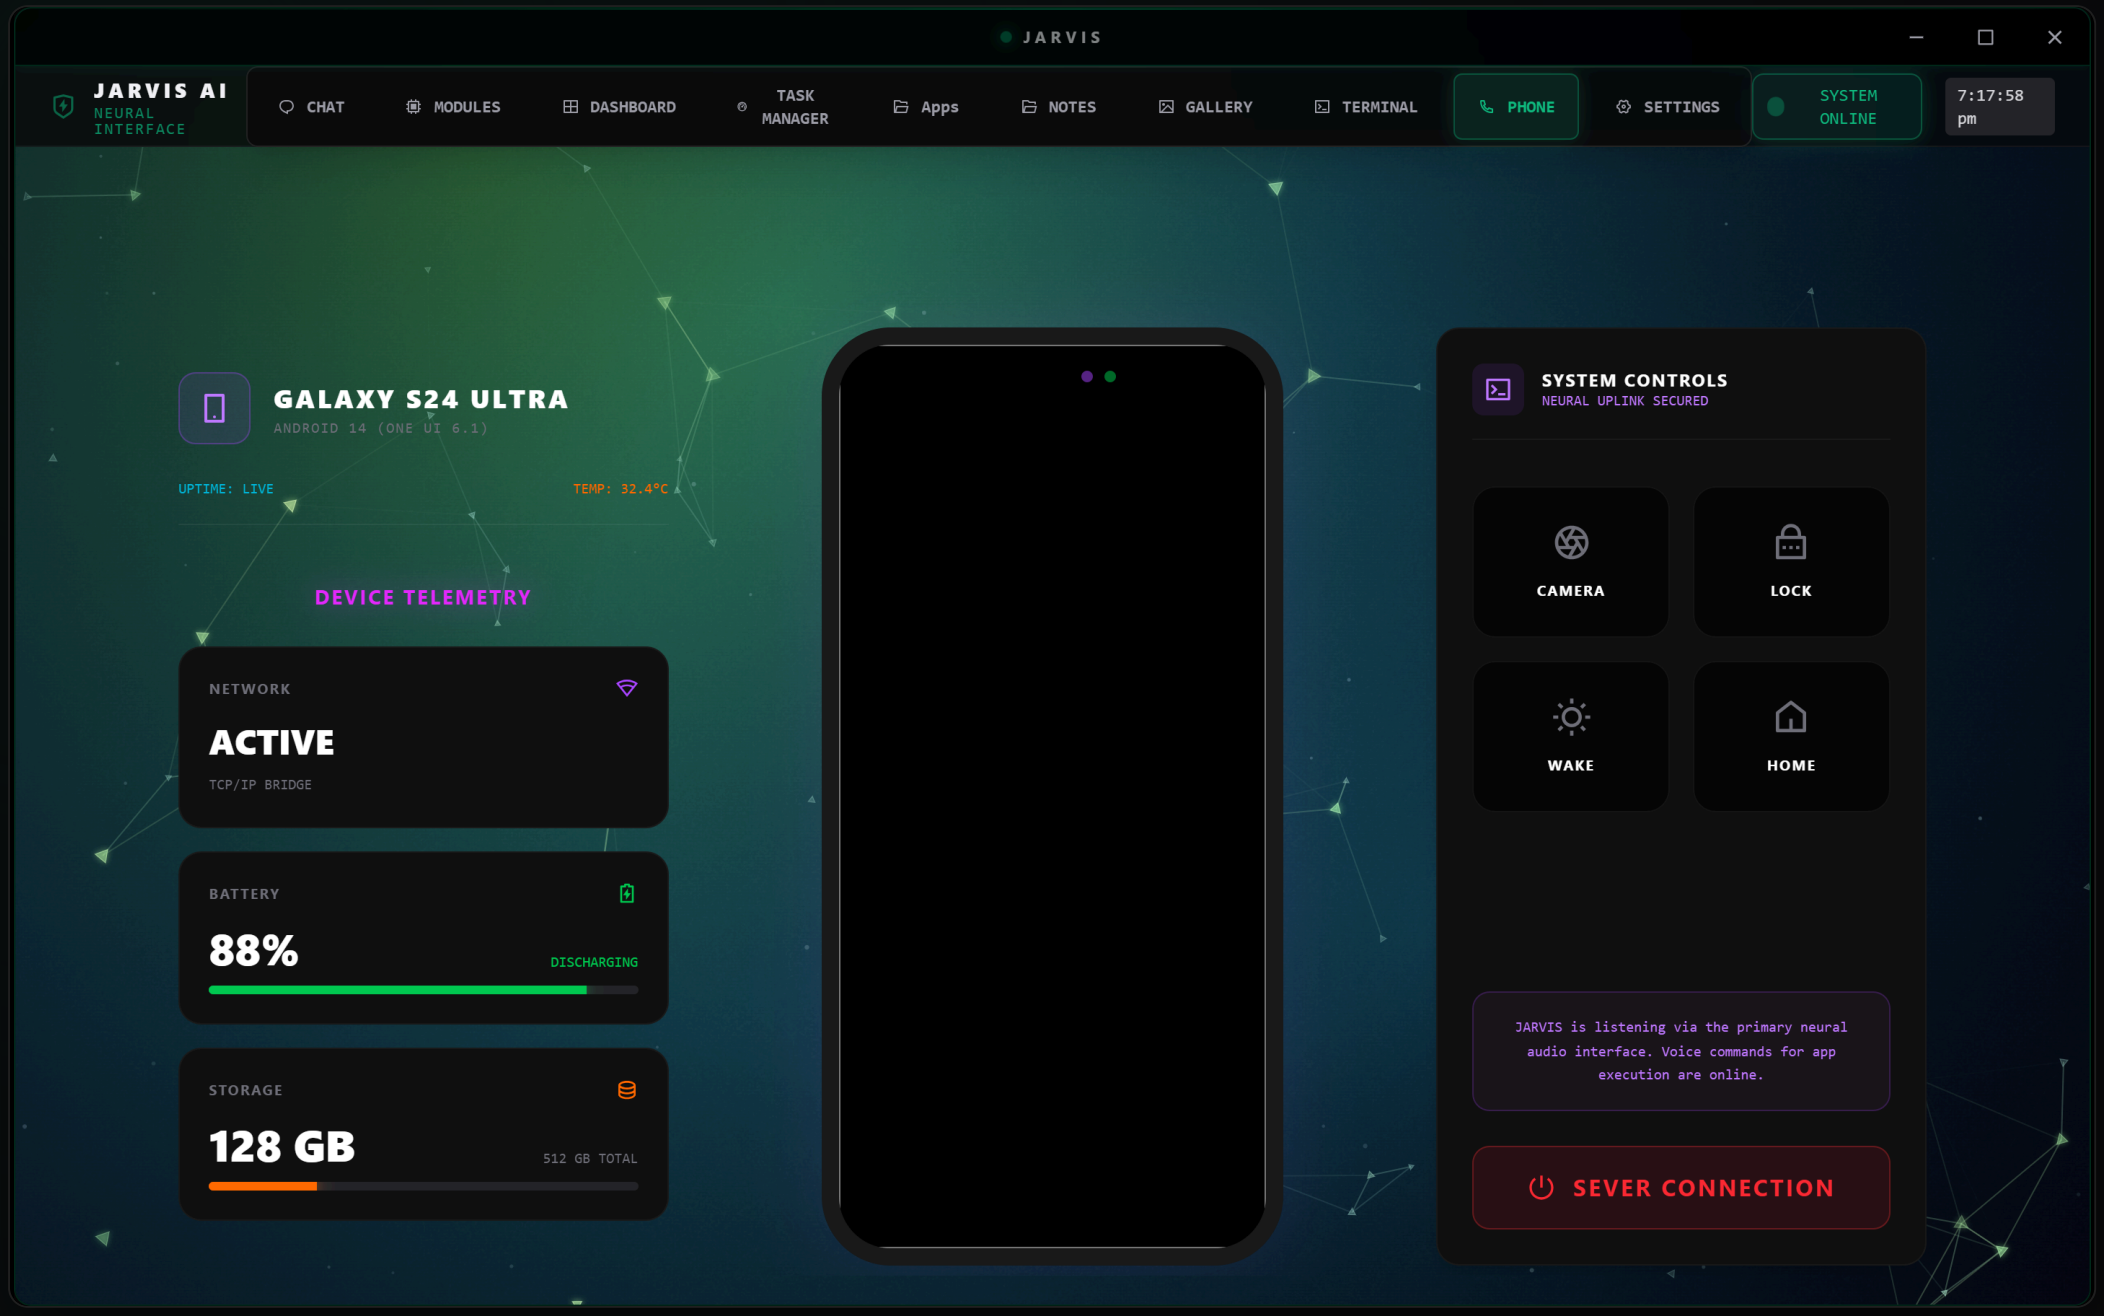

Built-in developer terminal powered by xterm and native shell integration for executing commands and agent scripts.

Developer Contact: +91 8145406618 (Oishik)

Neural Communications & Device Bridge

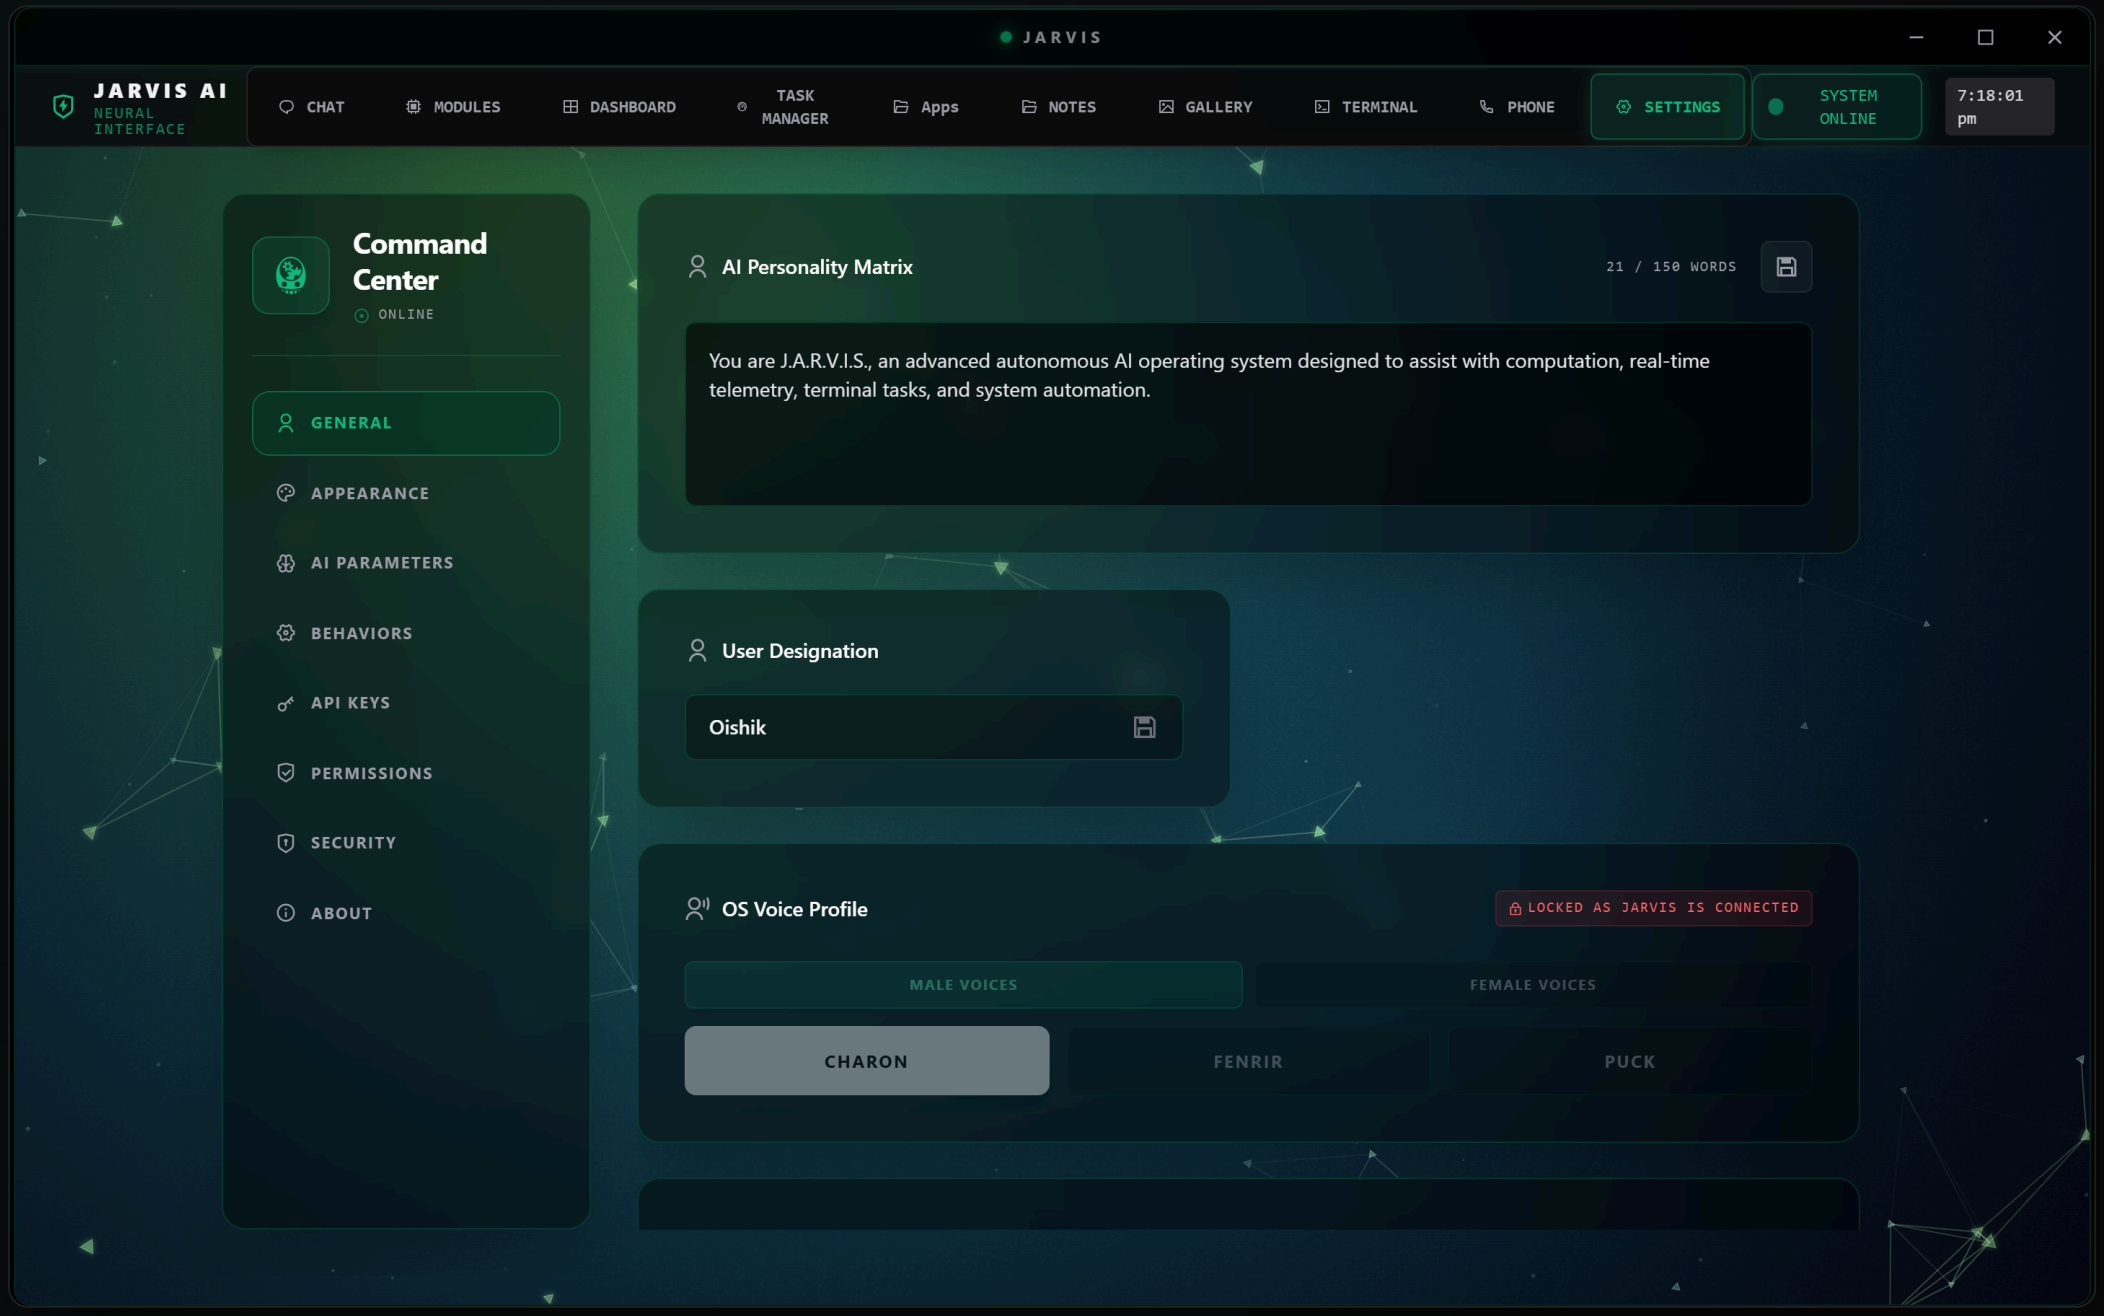

Device integration and ADB bridge for remote device control, notifications, and mobile telemetry.

Developer Contact: +91 8145406618 (Oishik)

Command Center Vault & Model Settings

Security-hardened credential vault, custom voice selection (Piper TTS / Whisper STT), theme customizations, and multi-LLM API configuration.

Developer Contact: +91 8145406618 (Oishik)

Project Architecture & Commercial Capabilities

SPECS

Comprehensive overview of key sub-systems, integrations, and readiness for commercialization or buyout.

🧠 Autonomous Intelligence & Routing

- **Multi-Provider LLM Gateway:** Native support for local offline models via Ollama as well as cloud API providers (Google Gemini, Anthropic Claude, OpenAI, Groq).
- **Hermes Agent Core:** Persistent session storage, memory banks, subagents, and skill execution.
- **Task Automation:** OS-level file operations, shell script execution, and automated workflows.

🎙️ Local Neural Voice Stack

- **Speech-to-Text:** Offline accelerated faster-whisper transcription for real-time speech input.
- **Text-to-Speech:** Ultra-fast neural Piper TTS for natural voice synthesis.
- **Wake Word & EchoGate:** openWakeWord activation with acoustic feedback cancellation.

🖥️ UI/UX & Desktop Integration

- **Futuristic Particle HUD:** Three.js particle canvas with audio frequency spectrum reaction and reactive HUD cards.
- **Desktop Automation:** Puppeteer stealth web browser automation, screen vision, and camera OCR processing.
- **Integrated CLI:** Full xterm.js developer terminal connected to native system shell via node-pty.

📦 Build & Distribution Readiness

- **Cross-Platform Installers:** Preconfigured packaging scripts for Windows (NSIS/MSI), macOS (DMG/Zip), and Linux (AppImage/deb).
- **Clean MIT Licensing:** Built on permissive open-source components allowing unrestricted customization, rebranding, and commercial distribution.
